Claims 16-85 are pending in this application.
Claims 1-15 are canceled.

Double Patenting Rejection

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 16-72, 84-85 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6 of prior U.S. Patent No. 6,716,825, while claims 73-83 are claiming the same invention as claims 1-3, 13. This is a double patenting rejection. In US '825, applicant claims generic phosphonate compounds having the formula in claim 1 wherein the phosphonate is bisphosphonate and the bisphosphonate is alendronate, etidronate, tiludronate, ibandronate, EB-1053, pamidronate, olpadronate, amino-olpadronate, clodronate or risedronate. Substituent R3 on the generic formula is a derivative of an antiviral nucleoside e.g. adefovir, cidofovir, cyclic cidofovir, tenofovir, or AZT. In the instant, applicant claims all of the above and further characterizes the bonds between the derivatives and the formula.

In US '825, applicant claims the method of using above phosphonate compounds for treating any viral infection in a mammal. In the instant, applicant claims the same method for treating individual viral infection in a mammal. This is a characterization of the "viral infection" claimed in US '825. Applicant should note that further characterization is not in and of itself patentable. Something old does not become new upon characterization or discovery of a new

property, utility or function. *In re Best*, 195 USPQ 430 (CCPA 1977). The new claims are drawn to the same subject matter as in US '825, and therefore are not patentable.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
